Intense Moisturizing Cream. A breakthrough moisturizer combines the height of luxury with the latest in scientific research and advanced technology that will change the face of skincare. The proprietary technology of Hydra-Pure Chelating Complex™ removes harmful impurities left on the skin from water. Heavy metals such as iron, copper, magnesium, lead and zinc are sequestered and pulled off the surface of the skin, reducing redness and irritation and increasing the penetration of active ingredients. Powerful humectants in the **Intense Moisturizing Cream**, provide time-released, constant hydration, maximizing environmental moisture. Leaves skin intensely moisturized—dewy, but never greasy.

Intense Hydra Mask. Achieve professional results at home with the **Intense Hydra Mask** in two easy-to-use steps. This weekly treatment leaves dry, dehydrated skin immediately plumper, smoother and younger-looking. Step 1 contains a concentrated hyaluronic gel with a cocktail of antioxidants that plump trouble areas, minimizing fine lines and wrinkles caused by dehydration. Step 2 is a self-heating mask that increases circulation and forces antioxidant and collagen-stimulating ingredients deep into the skin.
